HDF PRIMED DEEP MOULDED DOORS

HDF Primed Deep Moulded Doors are designed to combine elegance with durability, making them a perfect choice for modern interiors. Manufactured from high-density fiberboard, these doors feature deep moulded panel designs that enhance the overall aesthetic appeal of any space. With a smooth primed finish, they are ready to be painted in any color, giving complete flexibility to match your décor.

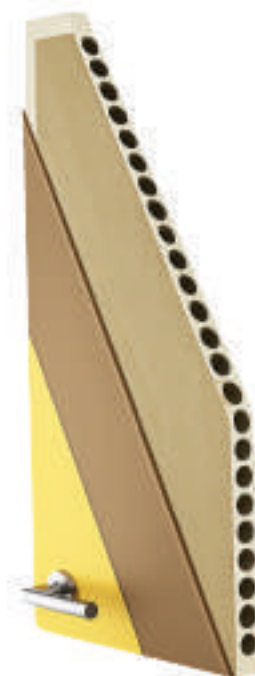

Their robust structure ensures resistance against warping, shrinking and cracking, while the lightweight design allows for easy installation. These doors not only provide strength and reliability but also add a refined touch of sophistication to homes, offices and commercial projects.

Crafted on premium Euro Board, this surface features advanced Anti-Scratch and Anti-Fingerprint technology, ensuring long-lasting beauty, durability, and a flawless finish for modern interiors

Euro Panel, designed to maintain its smooth finish and durability even with everyday use, ensuring long-lasting elegance for modern interiors.

A REVOLUTION IN THE WORLD OF DOORS

Tubular Core provides an ideal combination of light weight and stability. Compared to solid boards, the weight of Tubular Core is reduced by up to 60%. This impressive fact proves that high quality doors do not have to be heavy!. Tubular and solid cores have a very low thickness swelling, which is unusual for wood based materials. This makes them particularly suitable for doors with delicate surfaces.

Size available
